FILM POSITIONING UNIT

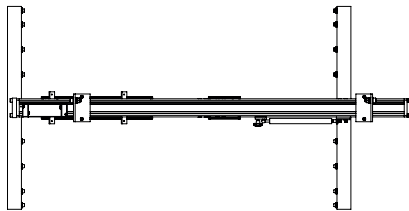

SPEED UP SETUP. LOCK IN PRECISION.

When it comes to screen printing, every second counts—and precision matters. That's where the MHM Film Positioning Unit (FPU) steps in. Designed for fast, accurate pre-registration, it helps you align artwork with screens effortlessly, reducing setup time and boosting print quality from the start.

With its smart design, ultra-low energy consumption, and unmatched precision, the MHM FPU is the perfect tool for screen printers who want to work smarter—not harder.

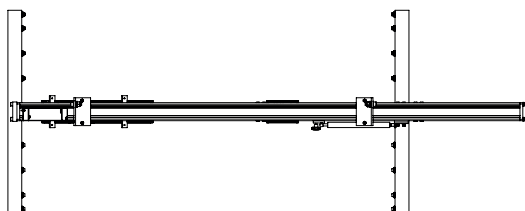

Ready to streamline your screen setup and elevate your prints? The FPU has you covered.

FPU S

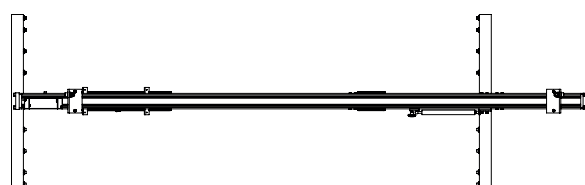

max. screen length: 1180 mm / 46.5"
min. screen length: 650 mm / 25.6"

FPU L

max. screen length: 1590 mm / 62.6"
min. screen length: 650 mm / 25.6"

FPU XL

max. screen length: 2150 mm / 84.6"
min. screen length: 650 mm / 25.6"

FREESTANDING AND FLEXIBLE

No need to block your exposure unit—this independent setup gives you full freedom while saving space and time.

FITS ALL FRAME TYPES

Compatible with both standard and roller frames, it adapts to your workflow with ease.

BUILT FOR SPEED

The integrated pin-bar system allows for quick, accurate registration every time—getting you print-ready faster.

PRECISION WITH EVERY POSITION

Fine-line LED guides help you align artwork with total accuracy—no guesswork, no wasted screens.

PRECISION WITH EVERY POSITION

Fine-line LED guides help you align artwork with total accuracy—no guesswork, no wasted screens.
